## Digital Experience & Design Systems Lead

Tel: +44 (0)7941 523 533    Email: [paultinker03@gmail.com](mailto:paultinker03@gmail.com)    Portfolio: [paultinker.uk](http://paultinker.uk) • [ai.paultinker.uk](http://ai.paultinker.uk)

---

Principal Digital Experience & Design Systems Leader with 20+ years leading digital transformation across global platforms. Expert in scaling user experiences, design systems and cross-functional delivery for international organisations including Nespresso, Vodafone and Smart Pension.

Currently exploring AI-native approaches to product design and multi-brand design systems.

Product Design • Product Strategy • Digital Transformation • Design Systems • Global Platforms  
Cross-functional • Leadership • Frontend Delivery

### PROFESSIONAL EXPERIENCE

---

#### Nespresso

Case study: [nespresso.paultinker.uk](http://nespresso.paultinker.uk)

##### Digital Experience & Design System Lead

Oct 2024 – Present

- Founding member of Nespresso's Digital Experience Revamp team, driving a global transformation across 42+ markets to unify B2C and B2B digital ecosystems.
- Led a cross-functional B2C delivery team spanning design, frontend engineering, accessibility, content and user testing, defining and shipping end-to-end web experiences and establishing a scalable delivery framework.
- Translated product requirements and technical constraints into structured experience design and frontend delivery plans, managing dependencies and coordinating execution across multiple teams.
- Directed the evolution of the global design system in line with new brand direction and revamp definition, translating it into scalable UI patterns, components and frontend implementation.
- Aligned a parallel B2B delivery stream with B2C and design system standards, ensuring consistency, reuse and cohesion across platforms.
- Partnered with distributed product, design and engineering teams across multiple markets and stakeholder groups to drive alignment and execution across a complex global programme.
- Supporting the phased global rollout of the new website and design system across markets, establishing the framework for 100% adoption by mid-2027.

##### Product Owner (Design System)

Mar 2024 – Oct 2024

- Owned roadmap definition and delivery prioritisation for Nespresso's design system squad covering web and native ecosystems.
- Translated product, design and engineering requirements into structured delivery plans, defining component standards, governance workflows and reusable UI patterns.
- Collaborated with designers and engineers on accessibility, localisation, acceptance criteria and scalable frontend architecture to improve consistency across markets and products.

## Smart Pension

Case study: [smart.paultinker.uk](https://paultinker.uk/case-study/smart-pension)

### Digital Lead (Product Design & Design System)

Aug 2020 – Jan 2024

- Led the design transformation of the Smart platform, rebuilding core Member, Adviser and Employer experiences used by organisations including Smart Pension UK, Allied Irish Bank and Zurich Insurance Group.
- Established the design system and redesigned core platform architecture, improving usability, consistency and delivery scalability through a shared component-based frontend model.
- Worked across multi-brand, multi-currency and multi-language requirements, including internationalisation and right-to-left Arabic language support, enabling consistent experiences across global product surfaces.
- Scaled design system adoption across distributed global teams, directly enabling product expansion into new international markets.

## Vodafone

Case study: [vodafone.paultinker.uk](https://paultinker.uk/case-study/vodafone)

### Digital Lead (Product Design & Design System)

Sep 2017 – Jul 2020

- Designed TOBi, Vodafone's AI-powered conversational chatbot, introducing a component and design system approach to conversational UI – reusable message bubbles, notifications, options, states, content and actions – that became the starting point for a global design system.
- Led design system work on Source, Vodafone's global design system, joining as the sole designer from inception after initially working across consumer digital products including My Vodafone App, retail, IoT platforms, and chatbot.
- Defined the initial system architecture, tooling, assets and governance model – including conducting the original audit and tool selection – laying the foundations for a component library used across global product teams, including My Vodafone App and M-Pesa.
- Originated and championed the strategy of extending Source to power Vodafone sub-brands without compromising individual brand identity or experience.
- Drove system-wide adoption from zero users to ~180 designers and developers across 16 countries, providing ongoing support and acting as primary advocate – from onboarding new teams to hands-on guidance at the market level.
- Across Vodafone, Source contributed to an estimated 40% improvement in delivery efficiency across key teams.

## Earlier Experience

Case study: [earlier.paultinker.uk](https://paultinker.uk/case-study/earlier)

### Various Agencies (Senior Designer & Art Director)

2004 – 2017

- Worked across leading digital agencies including The Guardian Labs, Razorfish, AKQA, Ogilvy & Leo Burnett
- Designed and delivered digital products, branded content and campaign experiences across publishing, automotive, finance and global consumer brands
- Collaborated within multi-agency and in-house teams across creative, UX and production disciplines
- Clients included Nespresso, Spotify, Nissan, NatWest, BlackBerry and NHS
- Work received recognition including Apple iPad App of the Week, FWA Site of the Day, Webby & Lovie Awards

## EDUCATION

---

### University for the Creative Arts (UCA)

BA (Hons) Graphic Design, 2:1

Sept 2001 – June 2004

Diploma in Foundation Studies in Art & Design, Distinction

Sept 2000 – June 2001
